06. Fleet and Vehicle Details

The following section outlines the available and indicative vehicle deployment pattern used by K T Logistics. This is designed to support efficient lane allocation, optimized load planning, and seamless transportation operations.

Total Vehicles (Approx.)

150+vehicles (mix of owned and attached units)

Vehicle Types

8ft, 10ft, 14ft, 17ft, 20ft, 22ft, 32ft multi-axle vehicles, and select containerized body vehicles for specific cargo types

Capacity Range

From 6 to 9 tons (small commercial segment) up to 15 to 18 tons (multi-axle and long-body segment), as per route and load requirement

Ownership Pattern

Mix of owned and attached vehicles, allowing flexible scaling based on demand peaks and seasonal volumes

Availability

Daily deployment on key lanes with on-call placement for spot and urgent dispatches, subject to prior intimation and confirmation

Bus

15+ Bus for staff (42&52 Seater)

06.1 Typical Vehicle Configuration Snapshot

The table below presents an illustrative mix of vehicles frequently used by K T Logistics for handling diverse shipment profiles and meeting varied client requirements.

Vehicle Type	Approx. Length	Load Capacity (Tons)	Typical Use Case
Containerized Body (as applicable)	8ft, 10ft, 14ft, 17ft, 20ft, 22ft, 32ft	As per model and configuration	Cargo requiring covered and relatively secure movement, including FMCG and packed goods, light engineering parts, and selective ecommerce loads

07.Compliance and Documentation Support

K T Logistics operates in compliance with applicable provisions of the Goods and Services Tax (GST) laws and relevant transport regulations. Documentation support typically includes:

- Use of valid GST registration and GSTIN in all tax invoices raised on clients.
- Assistance to clients in ensuring correctness of e-way bills and basic movement compliance, where required.
- Provision of proof of delivery (POD) and basic transit documentation for client record-keeping and internal audit.
- Route-based advisory and suggested service-level requirements relating to documentation timelines and handover.

08. Service Strengths and Value Proposition

K T Logistics aims to deliver consistent, dependable, and cost-effective FTL and route-based freight solutions with the following strengths:

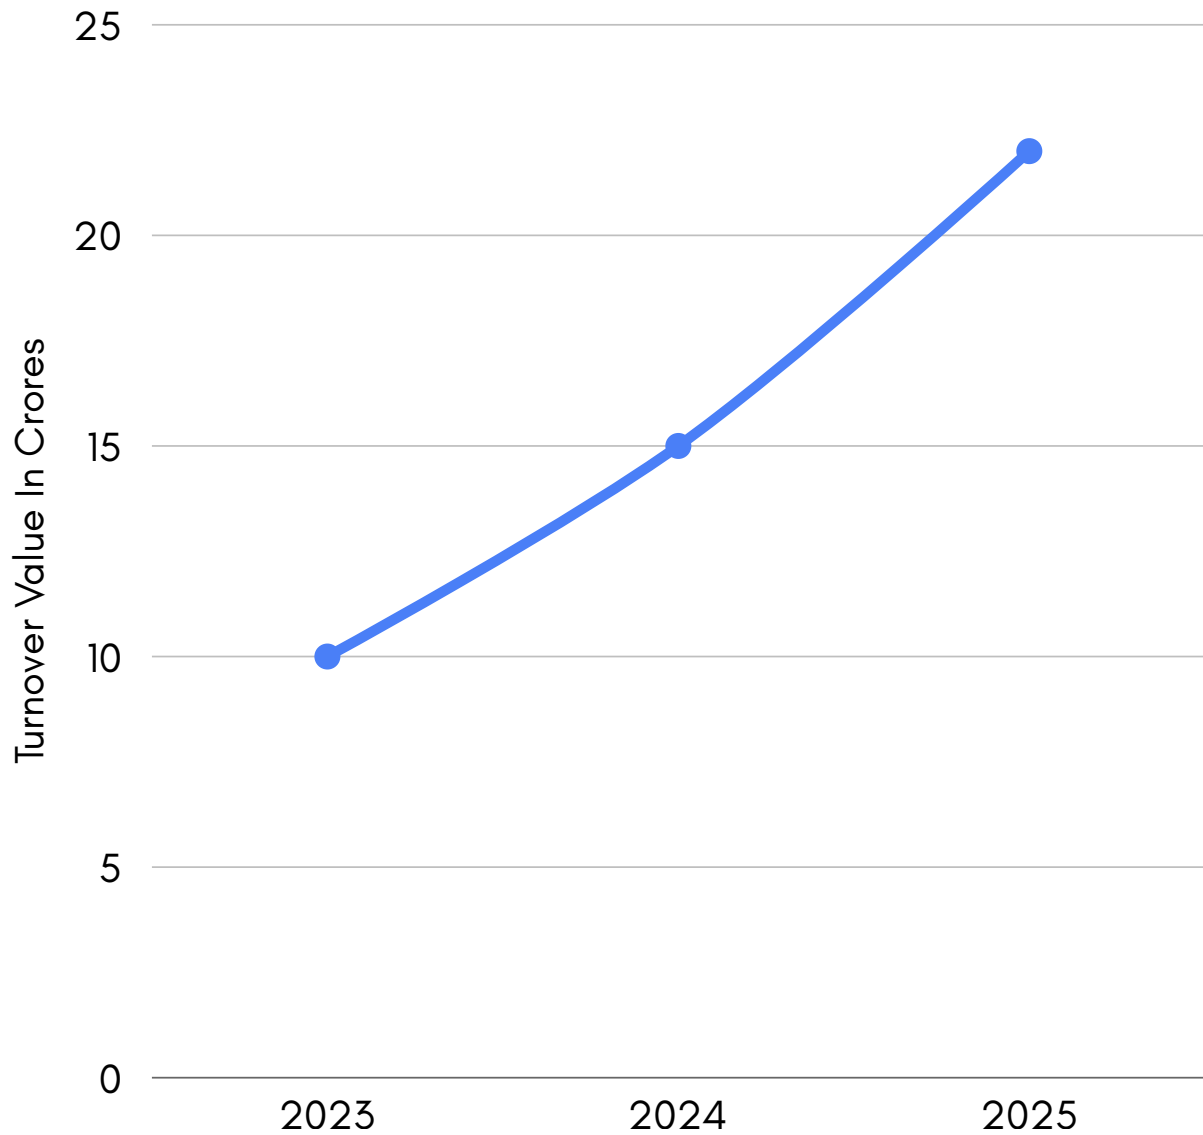

- Focused regional presence in Gurugram, Bilaspur, and adjoining industrial clusters, enabling better on-ground coordination.
- Flexible mix of owned and attached vehicles to handle demand surges and seasonal throughput.
- Ability to support route-based deployment for regular lanes, backed with shortnotice placement for urgent requirements, subject to fleet position.
- Support for GST-compliant documentation, e-way bill coordination, and POD-based billing with GST-registered status.
- Owner-driven business with direct involvement of the proprietor for escalation handling and critical shipment monitoring.
